ZERO HARM PHILOSOPHY

LINK MIDDLE EAST
Linked World Over

The LME GCC has adopted a "Zero Harm" philosophy that firmly emphasises that all work-related accidents, incidents, injuries and industry/work related illnesses are preventable, and which promotes:

- ✓ The immediate identification and elimination of unsafe work practices and conditions in the workplace.
- ✓ A heightened awareness of individual responsibility and increased supervisory attention to detail.
- ✓ Elimination of human error as a source of accidents, irrespective of rank or position in the organization.
- ✓ Building a team safety mentality where each worker contributes to the effort and each supervisor is fully aware of the capabilities and limitations of their team.
- ✓ A culture in which each individual accepts personal responsibility and accountability for his own health and safety as well as for that of each co-worker.
